

# Prevention is better than cure!

Our practice membership scheme has been set up to enable you to spread the cost of routine preventative health care. This allows us to provide you with the support you need to keep your pet fit and healthy year after year. It allows us to administer the appropriate vaccines, wormers and flea treatments at the correct time with minimal financial impact to you, the owner.

In addition, a thorough clinical examination allows us to carefully assess the general health of your pet and offer advice, support and treatment planning, which in many cases can prevent problems arising in the future.
